

# The Robotic Inspection

**SCANTRON brings you State of the Art Technology which gives a SAFE, DEPENDABLE WAY TO ECONOMICALLY INSPECT & CLEAN YOUR TANKS & RESERVOIRS.**

- ✓ No preparation required by the tank or reservoir owners
- ✓ The Seymour Rover allows you to inspect your tanks prior to taking them out of service for cleaning or maintenance.
- ✓ The water quality is not compromised during the inspection
- ✓ No confined space entry required
- ✓ The Seymour Rover can stay immersed for hours
- ✓ Leaving your tank in service saves man-hours and is cost-effective for your utility.
- ✓ All equipment is designated for potable water only
- ✓ Qualified NACE / AWS Inspectors operate the Rover

ScanTron will provide a video and written inspection report by a Qualified NACE / AWS Inspector. This gives the Owner details needed to make decisions on maintenance, repairs and overall condition of your tanks and reservoirs.
