The Robotic Cleaning

The SCANTRON CRAWLER gives you a SAFE, DEPENDABLE & ECONOMICAL way to clean your STORAGE TANKS & RESERVOIRS.

- ✓ The Scantron Crawler will professionally clean CLEAR WELLS, CONCRETE RESERVOIRS, STEEL TANKS, and ELEVATED TANKS any time of the year
- ✓ The reservoir remains in service during the cleaning process, fire protection and distribution are not compromised
- ✓ The power brush on the Scantron Crawler will remove sediment without causing turbidity
- ✓ Robotic cleaning is cost effective, saving the utility man-hours, with a minimum amount of water wasted
- ✓ Water patterns and leaks can be identified with the ROV that are not seen by conventional methods
- ✓ Inspection with a high resolution camera with powerful underwater lighting, allows visual inspection of the walls, floor, support columns, cracks, caulking, expansion joints, inlet/outlet pipe, drains and any other irregularities
- ✓ With the Robotic cleaning you receive a real-time video of the process, this assures the cleaning was performed to the owners satisfaction

CLEAN WATER IS SAFE WATER
